WiRoots

Your family tree *is ready.*

A private home for your family's story. Here's everything you need to get started, on one page. Keep it handy, or pin it up for the family.

YOUR FAMILY'S LINK	FAMILY CODE	YOUR SIGN-IN
yourfamily.wiroots.com	In your welcome email	Your email address

Get started

for you, the owner

1. **Open your invite link**
   It's in your welcome email. Choose a password (at least 12 characters). You're now the owner.
2. **Have a look around**
   Tap **Explore** to see the tree, and tap anyone to open their profile.
3. **Add a helper or two**
   Admin → Admins → make an invite link and send it on WhatsApp. Admins can approve entries with you.
4. **Share it with the family**
   Admin → Family codes has a "Send the link and code on WhatsApp" button that writes the message for you.

How relatives join

no app, no account

1. **Open the link**
   Type the family code once on their phone.
2. **Add Your Name**
   A first name and one relative is enough. Parents, children, partner and a photo if they know them.
3. **You approve**
   New entries wait for you under **Admin → Review**, with the best matches already picked.
4. **"This is me"**
   Tap it on your own profile, then tap anyone to see how you're related.

Bring your research

Admin → Import people takes Excel, CSV or a GEDCOM file from Ancestry or MyHeritage. Nobody gets added twice.

Print and share

Download the tree as a picture for WhatsApp, or a PDF for the reunion wall.

Keep a copy

Admin → Download backup saves everything. Do it now and then, and keep the file safe.

Card colours: living man · living woman · passed away · not known yet
